

## Getting Started with Java

To get started with Java, you need to do the following:

1. Download and install the following:

- a. Java Development Kit (JDK)
- b. TextPad

Note: Download these in order.

2. Configure Java to work with TextPad by following these steps:

- a. open the **Configure** menu.
- b. Preferences.
- c. expand Tools.
- d. click Add button in upper right.
- e. add a Program.
- f. use the Open dialogue to find your runJavaDoc.bat file.
- g. click Apply.
